

# Crawford Drawbridge 6050SKB

Large range fixed or movable drawbridge leveller

The Crawford Drawbridge Leveller 6050SKB can be installed in two different ways. It is either fixed in position by welding directly to a solid steel profile in the dock edge or movable sideways in a guide rail. It is the flexible solution for external applications for the medium working range up to about 200 mm level equalization. The outstanding feature is the quick and easy handling.

The high-tensile light metal allows weights up to 40 kN. The Crawford Drawbridge Leveller 650SKB complies with the European EN 1398 standard.

Feature and benefits:

- Non slip surface for safe transshipment of goods
- Easy to keep clean
- Robust and maintenance free
- Easy Handling and flexible positioning
